ILTA'S 2019 TECHNOLOGY SURVEY

Analysis and Results

ILTA's most prestigious publication each year is its annual Technology Survey. It provides substantive data against which firms can benchmark their organization's technology implementations and future plans. This year's survey reports the input of 537 firms representing more than 116,000 attorneys and 240,000 total users. Canon is a proud sponsor of ILTA and honored to be, once again, ranked #1.

The legal community is heavily influenced by peer recommendations for technology investment/procurement. The persistent ranking of Canon as #1 is a testament to Canon's valued status and reinforces its presence in the legal market. This survey covers the range of legal practice sizes, but the primary audience is the top 200 enterprise-class law firms.

- Canon is ranked #1 in the predominant legal industry tech survey.
- Canon has increased its position by three points since the previous survey,* up to **44%**.
- **Canon is 23 points ahead of its closest competitor!**
- Nearly all competitors decreased their market percentage over the previous survey.
- **Canon has held the #1 position for 17 years** on this survey since its inception.**

* This survey is conducted annually, but the "Photocopier" category is only added in every other year.

** The survey was started in 2001; the "Photocopier" category was added in 2003.
