

## School Security Efforts Can Benefit from Having an IN-HOUSE ID CARD PRINTER

The importance of security in educational institutions has become extremely relevant today. With the increasing need for heightened protection and safety, now, more than ever, it is imperative that schools limit access to education buildings and determine who is allowed inside. ID cards are a valuable resource that can help as part of access control efforts and to identify individuals. Students, visitors, faculty, and staff members can use IDs as an added security measure.

Canon's card and badge printer line-up can be used in conjunction with a school's established procedures in their security efforts. Producing ID cards in-house for identification and monitoring can be easy and cost effective. Printing on-demand allows users to print only what's needed, when it's needed, without maintaining a large inventory. Canon's card and badge printers can help users efficiently produce thousands of high-quality, personalized, two-sided ID cards in color.

### Benefits:

- ✓ **Identification:** Create school ID card that you can use to help identify individuals as part of access control to specific locations.
- ✓ **Help reduce risk:** Keep data within your control by producing your own cards, which can eliminate the need to send staff and student data to third-party vendors in order to create ID cards.
- ✓ **Cost effective:** It is more cost-effective for schools, who often work with a limited budget, to produce their own cards rather than to use an outside party.
- ✓ **Convenience:** Produce frequent, in-house, customizable cards to create efficient workflows within your school.

Many variables can impact the security of a customer's school, device and data. Canon does not warrant that the use of its solutions will prevent any security incident, malicious attacks, or prevent misuse of devices or data or other security issues. Canon U.S.A. does not provide security advice. Each customer must have its own qualified expert determine the advisability of a particular solution as it relates to security procedures.
